(9TH ICAT)

INTERNATIONAL CONFERENCE
ON APPROPRIATE TECHNOLOGY
NOVEMBER 23-27 2020

9TH ICAT ANNOUNCEMENT.

9TH ICAT POSTER EXHIBITION.

This is a great opportunity to showcase your research work!

For post-graduate and emerging researchers, it is also an opportunity to refine research concepts towards the completion of a full paper or a journal article. We aim to make this an educational experience and you will receive feedback from experts on the submissions.

For established researchers, it is a great opportunity to profile past, on-going and future projects.

Please see the poster format attached which is available on the website. You may also email FRANCINE at francinevt@gmail.com to send you the format. You have several different formats to select from. CHOOSE ONE LAYOUT. However, you are welcome to submit more than one poster with different topics. Please adhere to fonts, layout and do not change any of the headings and logo information on the poster. The poster content must include, in a concise format, all the main components of a research project (research question, motivation, methodology, outcomes, way forward etc.)

The posters must be submitted by Friday the 30th of October. A committee will review the submissions. The projects presented must be aligned with the conference themes which are available in a downloadable brochure on the website.

To be able to upload the posters to the shared dropbox folder, please send an email request to FRANCINE at francinevt@gmail.com - it is important to follow this procedure to guarantee inclusion!

GOOD LUCK FROM THE LOCAL ORGANISING COMMITTEE OF THE 9TH ICAT!
